

CNC Turner with Programming Experience

DLI Engineering are looking to recruit a **CNC Turner** to join their Team of Precision Engineers in **Trimdon, Co Durham** manufacturing parts for the Oil, Gas & Aerospace Industries.

As part of a successful team this role requires candidates **preferably** with **experience but not essential** of:

- Programming, setting and operating **Mazak** or **Puma** machines for one off components and batch runs.
- Machine a variety of **exotic materials** including Inconel, Super Duplex, Titanium etc.
- Experience **machining** medium to large components supplied to the Oil & Gas and Aerospace Industry standards.

It is **desirable** that applicants have experience of:

- Operating **CNC Lathes**
- Programming using **Fanuc** conversation or **Mazatrol**
- Turning metals to **tight tolerances**
- Reading and interpreting **engineering drawings**

As most of the work is bespoke and a high percentage one offs and small batch runs, this is an **interesting** and **varied position**.

We are offering **in-house training courses** on Mazak and Puma machines. This will incorporate programming, setting and operating Lathes.

There are various shift patterns 6am till 2pm, 2pm till 10pm, 6pm till 6am with an opportunity of overtime as required. OTE in excess of £40K

No Agencies Please.
